Postdoc position in Crossmodal Learning

The Biological Psychology and Neuropsychology section of the University of Hamburg seeks a scientist (postdoc) with documented backgrounds and interests in experimental psychology (in particular multisensory processing in humans), cognitive and computational neuroscience.

Candidates will have a Ph.D. in psychology, (computational) neuroscience or a related discipline. Research experience is required in cognitive neurosciences, computational neuroscience, and either non-invasive electrophysiological or brain imaging techniques in humans. A recognizable background in modelling is mandatory. The successful candidate should have a proven track record (e.g. first-author publications) in these fields. The goal of the research project is to develop new paradigms and modeling approaches in the domain of crossmodal learning. The research will be part of a collaborative research project with other neuroscience and computational science groups at the University of Hamburg and four Universities and research institutes in Beijing (China). The candidate will be involved in preparing an application for an international collaborative research center.

The start date will be decided by mutual agreement, but the position will be filled as soon as possible. The position is funded by a grant of the City of Hamburg. The contract will end by December 31, 2017. Salary is based on 1.0 TVL 13.

To apply for the position or for more information, please email your letter of motivation, CV and names of three referees to: Dr. Brigitte Röder: Brigitte.Roeder@uni-hamburg.de (see www.bpn.uni-hamburg.de). The deadline for application is April 30, 2015.
